Faculty of Engineering, Built Environment and Information Technology | Department of IT

GROUP MEMBER PEER EVALUATION REPORT (PHASE 2 BASELINE)

Module: ITC327W – Information Technology Work Integrated Learning (2026)

Project Title: Mangojane Integrated Funeral Management System Prototype

Group: The Extended Group (7 Members) | Module Coordinator: Mr. Mokoduwe

Assessment Milestone: Assessment 2 (System Architecture and Detailed Design - 30% Weighting)

1. OVERALL GROUP WORKLOAD & WORK ALLOCATION SUMMARY

This peer evaluation audits the individual workload, technical artefact delivery, commit activity, and collaborative contributions across all seven members of **The Extended Group** for the Phase 2 system design baseline. All evaluation data is reconciled with the official ITC327W_Project_Progress_Tracker_TheExtendedGroup.xlsx.

Student Name	Student Number	Assigned Role	Hours	Commit & Activity Evidence	Rating (/ 10)
Hlompho Compact Malejane	222025549	Lead Developer / Architect	42.0	28 commits, 4 PR reviews, Draw.io architecture author	10.0
Katleho Daniel Mokhele	221037680	Mobile Developer (Flutter)	40.0	22 commits, Figma mobile UI author, graphic asset exports	10.0
Lehlohonolo Sulvation Modise	222021816	Backend Engineer (Supabase)	38.0	19 commits, schema_3nf_source.sql author, Supabase config	9.5
Nomsa Nomankonya	216006365	Systems & Integration Analyst	36.0	14 commits, Use case specs author, stakeholder charter co-sign	9.5
Kamohelo Mohloho	223010767	Web Developer (ASP.NET Core)	35.0	16 commits, Razor view mockups, WebAdmin.fig author	9.5
Nthabiseng Patricia Moeketsi	211146692	QA & Documentation Specialist	35.0	16 commits, MS Project .mpp author, Risk Register owner	9.5
Lesego Precious Waeza	222041368	Requirements Engineer / Lead	34.0	15 commits, sequence diagram draw.io author, scope log	9.5
GROUP TOTALS & WEIGHTED AVERAGE			260.0 hrs	130 Total Commits / Repository Contributions	9.64 / 10

2. INDIVIDUAL MEMBER EVALUATIONS & SCORECARDS

1. Hlompho Compact Malejane (Student ID: 222025549) Role: Lead Developer / Software Architect Workload: 42 Hours Activity: 28 Commits, 4 PR Reviews Specific Artefacts Produced: 3-Tier System Architecture Diagram (Figma/Draw.io), 5-Way Traceability Matrix (FR ↔ UC ↔ Sequence ↔ ERD ↔ Screen), Master Integrated SRS Compilation, GitHub repository administrator. Technical Competence: Designed the high-availability decoupling between Flutter, ASP.NET Core, and Supabase in region af-south-1, enforcing POPIA security via RLS policies. Leadership & Reliability: Maintained repo integrity, reviewed team branches, resolved architectural conflicts, and led stakeholder audit discussions with Ms. Lerato Moipone Mangojane.	Rating: 10.0 / 10
--	-------------------

2. Katleho Daniel Mokhele (Student ID: 221037680)

Rating: 10.0 / 10

Role: Mobile Developer (Flutter) | Workload: 40 Hours | Activity: 22 Commits, Figma Mobile File Author

- **Specific Artefacts Produced:** 17 High-Fidelity Flutter Screens in Figma, Obsidian Black & Gold Palette redesign, Package Details screen with authentic rate cards, Client navigation flows.
- **Technical Competence:** Rapidly addressed stakeholder feedback by replacing default blue UI styling with authentic corporate colors (Obsidian #181513, Espresso #2B1F17, Gold #C59B27).
- **Reliability:** Met all Unit 3 wireframe deadlines ahead of schedule and validated client-side input models against database constraints.

3. Lehlohonolo Sulvation Modise (Student ID: 222021816)

Rating: 9.5 / 10

Role: Backend Engineer (Supabase) | Workload: 38 Hours | Activity: 19 Commits, schema_3nf_source.sql

- **Specific Artefacts Produced:** Normalized 3NF Relational ERD (6 entities) modeled in Oracle SQL Developer Data Modeler, PostgreSQL 15 DDL scripts, Supabase Data Dictionary, Row-Level Security (RLS) policies.
- **Technical Competence:** Implemented the compound collision constraint `uq_hearse_booking_date` to programmatically eliminate hearse scheduling clashes.
- **Reliability:** Maintained active backend configuration and verified synchronization between PostgreSQL foreign keys and C# entity models.

4. Nomsa Nomankonya (Student ID: 216006365)

Rating: 9.5 / 10

Role: Systems & Integration Analyst | Workload: 36 Hours | Activity: 14 Commits, Charter Co-Sign

- **Specific Artefacts Produced:** UML Use Case Diagram (System boundary, 5 actors, Generalization hierarchy), Detailed Use Case Specifications (UC01–UC10), Stakeholder Interview Minutes.
- **Technical Competence:** Rigorously modeled UML 2.5 relationships, correctly differentiating <<include>> requirements from conditional <<extend>> exception paths.
- **Reliability:** Consistently represented the group during stakeholder on-site interviews and documented verbatim business requirements.

5. Kamohelo Mohloho (Student ID: 223010767)

Rating: 9.5 / 10

Role: Web Developer (ASP.NET Core) | Workload: 35 Hours | Activity: 16 Commits, WebAdmin.fig Author

- **Specific Artefacts Produced:** 4 ASP.NET Core 8 Administrative Views (Staff Login, Real-Time Triage Queue, Fleet Scheduler Calendar, Policy Ledger / Route Sheet PDF Export).
- **Technical Competence:** Scaffolded responsive administrative wireframes in Figma and verified backend controller mappings for hearse and driver allocation services.
- **Reliability:** Participated actively in weekly code reviews and coordinated interface requirements with the mobile team.

6. Nthabiseng Patricia Moeketsi (Student ID: 211146692)

Rating: 9.5 / 10

Role: QA & Documentation Specialist | Workload: 35 Hours | Activity: 16 Commits, MS Project .mpp Author

- **Specific Artefacts Produced:** Microsoft Project Schedule Baseline (.mpp Gantt chart), Progress Tracker Excel maintenance, GitHub clean repo audit, POPIA Synthetic Test Data Suite.
- **Technical Competence:** Audited git commits to prevent credential exposure; verified 100% completion of Unit 3 design tasks against university rubrics.
- **Reliability:** Tracked team milestones diligently and ensured complete alignment between schedule targets and group submissions.

7. Lesego Precious Waeza (Student ID: 222041368)

Rating: 9.5 / 10

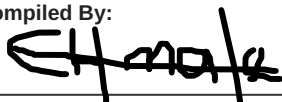

Role: Requirements Engineer / Lead | Workload: 34 Hours | Activity: 15 Commits, Sequence Diagram Author

- **Specific Artefacts Produced:** Dynamic UML Sequence Diagrams (Mobile Client Intake & Administrative Dispatch), Business Logic Validation, Conflict Collision SQL Algorithm, Feasibility Analysis.
- **Technical Competence:** Modeled synchronous and asynchronous WebSocket communication between presentation lifelines, PostgREST API, and PostgreSQL storage.
- **Reliability:** Coordinated requirement changes with the architecture team and ensured all stakeholder edge-cases were documented.

3. GROUP REFLECTION & COLLABORATIVE VERDICT

The Extended Group exhibited outstanding cohesion, technical discipline, and equitable workload distribution throughout Phase 2. Technical responsibilities were cleanly partitioned across system architecture, Flutter mobile engineering, ASP.NET web development, Oracle SQL database modeling, and documentation quality assurance. All seven group members met their milestone deliverables without technical bottlenecks, yielding a group performance rating of **9.64 / 10**.

Compiled By:

Hlompho Compact Malejane

Lead Developer / Architect (The Extended Group)

Verified & Approved By:

Mr. Mokoduwe

Module Coordinator (ITC327W - FEBIT, CUT)
